

STAGE BOXES

KEY FEATURES

- Ω Extra wide connector spacing (60mm)
- Ω Common Box Size; 60mm x 65mm x 350mm
- Ω Heavy duty steel construction; 1.0mm, zinc galvanized
- Ω Unique textured Hammertone powdercoat
- Ω 2 x integral M10 threads for mounting points
- Ω 4 x 10mm non-slip runner feet
- Ω All-bolt construction for easy maintenance
- Ω Indelible colour markings for easily circuit identification
- Ω Full Quality Control with component Serial Number tracking

ELECTRICAL

Input

- Ω 1x 16A TrueCON

Output

- Ω 4x 15A Australian GPO

Protection

- Ω Hydraulic Magnetic Double Pole Circuit breaker - 16A rated at all temperature conditions unlike traditional units
- Ω Integrated Red Neon
- Ω Finger Guard

PHYSICAL

Nett

Height:	60mm
Width:	65mm
Length:	350mm

DESCRIPTION

The OmegaTech Stage Box Strip (SBS) is a "dead-head" design of the highly successful powered Stage Box. Unlike their big brother; these units have a 1-in / 4-out with no loop through connector. Paired with our new 6 channel PDU's these units offer the ideal balance between purpose, redundancy and size. 4 configurations available with units kept in stock ready to ship.

MECHANICAL

Stage Box Strips measure 65mm wide x 60mm high and x 350mm long. The chassis is constructed of 1.0mm steel. Metal surfaces are zinc treated and finished in a signature, hard wearing, off black textured hammertone which resists scratches or marks. The unit is fitted with 2 industry standard M10 internal threads (bottom and side) for easy mounting options.

COMPLIANCE

All OmegaTech products are built to comply with Australian Regulations including:

- AS/NZS 3002:2021 — Electrical Installations — Shows and carnivals
- AS/NZS 3105:2014 — Approval and test specification — Electrical Portable Outlet Devices
- AS/NZS 4417:2020 — RCM/EESS Responsible Supplier in the Electrical Equipment Safety System
- AS/NZS 61439:2016 — Australian Standards for low-voltage switchgear and control gear assemblies
